

SERVICE BULLETIN – SV-02

Product: Site Vantage

Subject: Firmware 1.0.2 Release

Date: 26th May 2025

Description

This Service Bulletin announces the release of 1.0.2 firmware for Site Vantage product.

The version 1.0.2 firmware update file ("swu") is available for download from the RFI website <http://www.rfi.com.au>.

Product Enhancement

The version 1.0.2 firmware provides enhancements and addresses a few reported issues in earlier versions of firmware. Changes introduced in version 1.0.2 include:

- i) An earlier issue where the RF analyser was unresponsive during concurrent test executions is fixed.
- ii) An earlier issue where the uplink P25 TDMA timeslots were incorrectly jumping between timeslot 1 and 2 is fixed.
- iii) An earlier issue where external voltage was not updated if alarm thresholds were set is fixed.
- iv) Alarm latency is improved to less than 10 seconds in most cases.
- v) Responsiveness and consistency of RF Tests page are improved.
- vi) Support to change HTTPS SSL key algorithm is added.

Cost Impact

Firmware version 1.0.2 is available to RFI customers at no charge.
